

CONTROL CABLES

Honda Recommended Glendinning Pro-X Cables™

Why Pro-X Control Cables™?

Let's face it – you've made a substantial investment in your boat and you've got a lot riding on the line. The operation of your control cables will either give you hours of boating pleasure or cause you to regret your purchase. With so much riding on the line, wouldn't you rather go with professional grade control cables?

Features & Construction

Not all control cables are created equal! With the competing demands of higher performance and lower costs, many companies have sacrificed the long-term advantages of high performance cables for the short-term benefit of lower costs. That's a sacrifice we're not willing to make. Pro-X Control Cables feature:

- **“Armored” Core**—Highly efficient “armored” core technology is the best in the industry. Stainless steel flat wire swaged over stainless steel stranded cable and burnished to a smooth, close tolerance finish, provides high flexibility and incredible strength.

- **Inner Liner**—Specially processed polymer liners minimize friction for maximum efficiency. The inside diameter is precisely controlled to minimize lost motion and premature wear, problems that seem to plague most “splined” or “grooved” liners.

- **Conduit**—A “full complement” of reinforcing wires are placed in a long lay pattern to protect the liner and inner core. The close tolerances achieved between the cable core and conduit result in minimal deflections during cable operation, assuring precise controlling action to the operator.

- **Outer Jacket**—Heavy duty, high density, non-hydroscopic polymer jacket is extruded onto the conduit for maximum cable strength and abrasion resistance.

- **End Fittings**—300 series stainless steel and nickel-plated brass are used throughout to ensure maximum corrosion resistance.
- **Seals & Boots**—Durable polymer seals are used to prevent moisture and contaminants from entering the cable.
- **Best Warranty in the Industry**—We give you more confidence with Pro-X Control Cables on board your boat by backing up our claims with a 5-year warranty. Without a doubt, it is the best warranty in the industry.

Installation

Install with a minimum 6 inch radius.

CONTROL CABLES

Black, Pro-X Cable
