

PRODUCT UPDATE NOTICE

BF200AK3 • BF225AK3 • BF250A Outboards

LEFT TIMING BELT DRIVEN PULLEY REPLACEMENT

Check the list of affected serial numbers to see if your outboard is affected by this product update.

What is the problem?

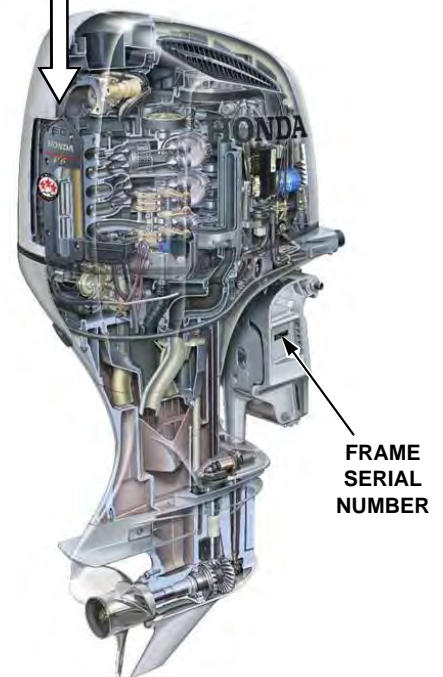

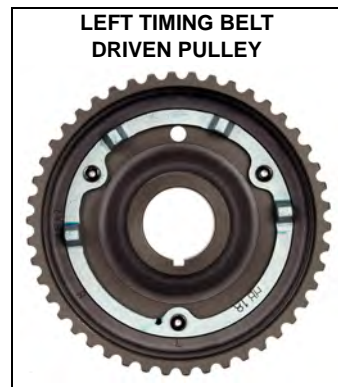

The left timing belt driven pulley may interfere with and damage the TDC sensor due to improper riveting on the pulley’s sensor pick-up plate.

If the left timing belt driven pulley fails, the warning system buzzer on the outboard motor will sound and the engine will shut off and cannot be restarted.

What should you do?

Please contact your Honda Marine servicing dealer to make arrangements to have your BF200AK3, BF225AK3, or BF250A repaired. The dealer will replace the timing belt pulley and, if needed, the TDC sensor at no charge to you while the outboard is still under warranty. Transportation of the outboard to the dealer is the responsibility of the owner.

If you need assistance locating a servicing Honda Marine dealer, please visit our website: marine.honda.com or call our customer service line at (770) 497-6400.

Affected Serial Numbers

If your frame serial number is listed below, your outboard is affected by this product update.
