Visit us at gen.honda.com.

For Honda Generators warranty information, please visit powerequipment.honda.com/support/warranty. Please read the owner’s manual before operating your Honda Power Equipment and never use in an unventilated or partially ventilated area where you could be exposed to odorless, poisonous carbon monoxide. Connection of a generator to house power requires a transfer device to avoid possible injury to power company personnel. Consult a qualified electrician. Specifications subject to change without notice.

There are a lot of reasons to insist on genuine Honda Generators. That’s because at the heart of every one of Honda’s gas-powered portable generators you’ll find a legendary Honda four-stroke engine. As the world’s largest engine manufacturer, Honda offers more engine experience than anyone. Experience born and tested on racetracks and roadways around the globe. Experience that continuously keeps us on the cutting edge. From automobiles, motorcycles, and all-terrain vehicles to marine engines, general-purpose engines, and power equipment products, Honda is committed to designing products that meet or exceed the demands of our customers.

Throughout our history, Honda has been dedicated to technological and environmental innovation, and today is no different. We continue to work hard to build our reputation for unsurpassed quality, performance, and reliability. It’s a reputation worth considering the next time you’re in the market for a portable generator.

**Honda iGX Engines Take Intelligence to a Whole New Level.**

Honda’s innovative iGX Series, a generation of intelligent computer-controlled engines, are on Honda EM and EB Series 5000 watt and 6500 watt generators.

The iGX models employ a digital CDI ignition system to dramatically improve ignition timing. They also feature an integrated electronic control unit (ECU) that communicates with a self-tuning regulator (STR) governor system, which allows the engine to communicate with the generator it is powering. As the engine becomes intelligent, operation is automated and control becomes more precise, faster, and easier. Thus delivering exactly what you’ve always wanted: optimal performance.

**Powered by World-Famous Honda Engines.**

All Honda Generators feature either our Honda GX or iGX engines. These four-stroke engines are recognized as the industry leader in providing reliable, quiet, fuel-efficient power, plus legendary Honda reliability.

**The New Honda GX130: A High Output Engine Built for High Output Lifestyles.**

Honda’s all-new EU3200i generator offers 3200 watts of power in a compact, easy-to-move package weighing only 59.1 lbs. The secret is in the powerful Honda GX130 engine. It’s the world’s first high output generator engine—giving you the power to do more, without sacrificing portability.

- Purpose built compact and lightweight engine
- Improved cooling for lasting engine performance
- 7% more displacement than the EU2200i engine
- 45% more electrical power than the EU2200i

The all-new Honda EU3200i features a Honda GX130 high output, fuel-injected engine, ensuring quick, chokeless starting in a powerful, compact package.
EU Series generators represent the leading edge of portable power technology. Ranging from 1000 to 7000 watts, these totally enclosed, super quiet generators are ideal for recreational and home backup applications.

Super Quiet Series (Pages 14-15)

The 4000 watt EG Series generator is ideal for residential and DIY use, and offers legendary Honda reliability with a simple approach to your power needs.

Economy Series (Page 16)

EM Series generators with electric start are available in 5000 and 6500 watt models and offer a wide variety of enhanced functions for home backup and general purpose situations.

Deluxe Series (Page 17)

EB Series generators range from 2200 to 10000 watts of industrial strength power. They have earned a reputation in the construction and rental industries for their rugged reliability.

Industrial Series (Pages 18-19)

Wherever You Need It, Honda Has the Power to Keep You Going.

For work.

Why are Honda Generators number one on the job? That’s easy—Honda’s renown reliability and durability. On construction sites, time is money; crews can’t afford to be idle due to a lack of on-site power. Minimal downtime plus maximum dependability equals the most productive job sites.

For home.

When the lights go out, it’s more than just an inconvenience. Power outages can also result in financial loss due to spoiled food, lost work time, frozen water pipes, and the damage to the building and property that follows. A quiet, reliable Honda generator can easily help give you peace of mind through power-related emergencies. It can also be used to charge your 12-volt car battery.*

For play.

For camping and RV power, Honda portable power is the perfect way to enjoy the great outdoors with all the comforts of home. Portable generators are also ideal for outdoor events like concerts, races, parties, tailgating, and more. That’s why Honda Generators is the official supplier of INDYCAR® and the first choice of many race teams and race tracks for their portable power needs.

Generators For Every Application

Fuel Efficient
Honda’s superior technology, with features such as Eco Throttle® and Auto Throttle®, means increased fuel efficiency and longer run times.

Quiet
Thanks to the use of inherently quiet four-stroke engines and superior technology, Honda Generators boast incredibly low decibel levels.

Portable
Honda Generators are made for true portability, from lightweight, easy-to-carry models, to those with built-in wheels & handles, to optional transport kits.

Clean Power
Consistent delivery of clean power is possible with technologies such as Inverter, DAVR, and iAVR voltage regulating systems.

*Model-specific feature. Requires optional charging cord.
Honda Generator Technology

Inverter Technology
Stable, clean power in a smaller, lighter package.

Computers and electrically-sensitive equipment require what is referred to as “clean power.” Clean power is electrical current that is consistent and has a stable sine wave or signal. If the lights or other basic appliances in your home were being powered by a generator and there was a fluctuation in the AC power, you’d probably see the lights flicker—no problem! However, the same fluctuation can cause a power interruption that results in a loss of valuable work on your computer.

While all Honda Generators provide stable power, Honda engineers developed a revolutionary form of inverter technology. This process takes the raw power produced by the generator and passes it through a special microprocessor. This means you can operate a computer or other sensitive equipment from a remote location with even less possibility of interrupted service or damage to the equipment.

Using inverter technology, Honda engineers have integrated parts from the engine and generator set, resulting in a more compact and lighter product that is purpose-built to make clean, reliable power.

Eco Throttle® System
Fuel economy and quiet operation are standard.

Eco Throttle® automatically adjusts engine speed to the optimum level, given the usage load, through a load-dependent, electric governor. This not only results in excellent fuel economy, but also makes a quiet generator even quieter. Eco Throttle® is standard on all inverter models.

Automatic Voltage Regulation
Consistent delivery of power under different loads.

The EG4000CL and EB10000 feature a DAVR (Digital Automatic Voltage Regulator) designed to hold the voltage stability within a +/- 1% change during operation to which the U.S. standard is 60Hz.

EM and EB Series 5000 and 6500 watt models offer a proprietary Honda technology, iAVR (Intelligent Automatic Voltage Regulator). This consists of a digital capacitive discharge ignition, a self-tuning electronic governor, a current transformer applied to the Auto Throttle and the AVR control unit. iAVR lets the generator operate well above its maximum rating for up to 10 seconds to start high initial amp draw situations. This ensures a consistent flow of power and translates into protection for sensitive equipment and reliable power for you.

Fuel Injection Technology
For maximum fuel efficiency and increased reliability.

EU3200i and EU7000is models provide super quiet, portable electronic fuel injection power suitable for various applications. Smart electronic fuel injection technology means reliable operation and reduces potential fuel problems while increasing fuel efficiency.

CO-MINDER® CARBON MONOXIDE (CO) DETECTION SYSTEM
Safety for everyone.

At Honda, we care about safety. Everybody’s safety. As a leader in the portable generator industry, product safety has always been, and always will be, a top priority. That is why all Honda portable generators are equipped with our advanced CO-MINDER® carbon monoxide (CO) detection system. This function aids in reducing the risk of injury or fatality due to accidental carbon monoxide poisoning.

The CO-MINDER® system is designed to continuously measure CO levels near the generator, and automatically shut down the generator if detected carbon monoxide levels are too high. The sensor is designed to automatically test itself, and has a built-in warning that alerts the customer to replace the sensor prior to its end of life. CO-MINDER® sensors conform to UL standards and are moisture and dust resistant.

CO-MINDER® is designed to help ensure that everyone who operates a Honda generator can do so with confidence, providing users, friends, and families with added peace of mind.

As a leader in the portable generator industry, Honda is proud to be the industry’s first manufacturer to install CO detection devices on 100% of our generators.

Honda My Generator App
Putting the power of Honda Generators in the palm of your hand.

The exclusive Honda My Generator smartphone app, paired with built-in Bluetooth® connectivity on select Honda generator models, offers remote generator operation and monitoring with impressive performance, unmatched convenience, and a host of other benefits.

Honda My Generator monitors and reports a range of information, such as output power, engine operating hours, oil life, and on the EU5200i and EU7000is, fuel level. It also issues maintenance reminders and alerts, including if a generator is shut down by CO-MINDER®:

- Honda My Generator gives the user the ability to control stop or start-stop functionality, monitors the Eco Throttle® fuel-efficiency feature on specific models, and allows control of multiple compatible Honda Generators with a single app.

MODELS FEATURING BLUETOOTH® TECHNOLOGY

EU2200i | EU2200i Cama | EU2200i Companion | EU3200i | EU7000is | EM5000SX | EM6500SX

* Never use a generator in an enclosed or even partially enclosed area. Generator exhaust contains carbon monoxide—a colorless, odorless gas that can cause unconsciousness or death. To prevent a potential disaster, you must operate the Honda My Generator app in an open area. App features and functionality may vary based on specific compatible Honda generator models. The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by American Honda Motor Co., Inc. is under license. Other trademarks and trade names are those of their respective owners.

Honda offers consistent delivery of clean power.

Inverter technology is available on eight Honda Generators, designated by an “i” after the model number.

NOTE: Check your equipment or appliance for actual wattage requirements.

Ask your Honda Dealer to help you select the most efficient model for your power needs.
Generator Selection Guide

Need some help deciding which Honda generator will best meet your needs? Use our Generator Selection Guide to help narrow your choices to 2-3 models. These estimates will meet most user’s needs, but be sure to check your individual appliances for their actual wattage requirements. You can get a better estimate on a variety of tools and appliances using the chart on page 9. It’s also a smart idea to discuss your choice with your Authorized Honda Power Equipment Dealer.

**HOME (HOME BACKUP POWER)**

1) Estimate your wattage requirements.

What kind of water, furnace, and hot water heater do you have?
- Utility water; gas, oil, or LP furnace; gas, oil, or LP hot water heater: You can power your home with a 3000-4000 watt generator. You could also consider choosing a smaller generator, like the EU2200i, to handle basics like the refrigerator, TV, microwave, and lights.
- Well water; electric hot water heater; gas, oil, or LP furnace: You need a 5000-7000 watt generator with 120/240V capability.

2) Decide on a series.

What combination of features and value is right for you?
- **EG Series:** Reliable power at an economical price
- **EM Series:** Adds additional features, including electric start, wheel kit, and more
- **EU Series:** Adds even more features, like Super Quiet operation, Inverter quality power, and longer run time

3) Combine series and wattage together to find the best models for your needs.

For example, if you need 5000-7000 watts, and prefer the conveniences of electric starting and a built-in wheel kit, consider the EM5000SX, EM6500SX, or EU7000is.

**WORK (INDUSTRIAL & CONSTRUCTION APPLICATIONS OR DIY PROJECTS)**

1) Estimate your wattage requirements.

How will you be using the generator?
- **Camping:** small appliances (Lights, Fan, Computer, Battery Charging)–1000-2200 watts
- **Camping or tailgating:** medium appliances (Microwave, Hairdryer)–2200-3200 watts
- **RV – 1 A/C unit (up to 13,500 BTU):** 3000-4000 watts
- **RV – 2 A/C units:** 6500-7000 watts

2) Decide on a series.

What combination of features and value is right for you?
- **EG Series:** Reliable power at an economical price
- **EU Series:** Adds even more features, like Super Quiet operation, Inverter quality power, and longer run time

3) Combine series and wattage together to find the best models for your needs.

For example, if your wattage is 3000-3200 watts, and you want to power most single 13,500 BTU RV air conditioners plus additional appliances, consider the EU3200i.

**PLAY (RECREATIONAL USE, SUCH AS RV POWER, TAILGATING, OR CAMPING)**

1) Estimate your wattage requirements.

How will you be using the generator?
- **Camping:** small appliances (Lights, Fan, Computer, Battery Charging)–1000-2200 watts
- **Camping or tailgating:** medium appliances (Microwave, Hairdryer)–2200-3200 watts
- **RV – 1 A/C unit (up to 13,500 BTU):** 3000-4000 watts
- **RV – 2 A/C units:** 6500-7000 watts

2) Decide on a series.

What combination of features and value is right for you?
- **EG Series:** Reliable power at an economical price
- **EU Series:** Adds even more features, like Super Quiet operation, Inverter quality power, and longer run time

3) Combine series and wattage together to find the best models for your needs.

For example, if your wattage is 3000-3200 watts, and you prefer the convenience of a quiet and lightweight generator, consider the EB2200i.

**EU SERIES**

- EU2200i
  - Recreational, inverter, home backup, DIY, sensitive equipment, small appliances

- EU3200i
  - Recreational, inverter, home backup, DIY, sensitive equipment

- EU7000is
  - Recreational, inverter, home backup, Diy, sensitive equipment

**EG SERIES**

- EG4000
  - Home backup, DIY, recreational use

**EM SERIES**

- EM5000
  - Home backup with iAVR high amp load starting, recreational use

- EM6500
  - Home backup with iAVR high amp load starting, recreational use

**EB SERIES**

- EB2200i
  - Jobsite portability at only 48 lbs., sensitive equipment

- EB6500
  - Tools with iAVR high amp load starting on OSHA-regulated jobsites

- EB10000
  - 630cc V-twin engine, full GFCI protection, and large fuel tank
The All-New Honda EU3200i

Bring out the outdoor enthusiast in you with the all-new Honda EU3200i. Delivering more power and more convenience in a compact, portable package, its robust 3200 watts is what you need to run most 13,500 BTU RV A/C units—plus lights, appliances, and more. The EU3200i offers a range of conveniences, including quick and easy 2-step starting, the freedom of remote smartphone control, exceptional fuel efficiency with long run times, and integrated upper and lower handles for easy lifting, moving, and storing.

EU3200i Features:

• **3200 Watts Of Portable Power**
  3200 maximum watts of reliable power runs most 13,500 BTU RV A/C units—plus lights, appliances, and more!

• **Compact & Lightweight Design**
  At only 59.1 pounds, it’s portable, packable, and is equipped with integrated upper and lower handles to assist transporting.

• **Easy Starts & Simple Operation**
  Quick and easy 2-step chokeless starting thanks to its fuel-injected Honda engine: just turn on and pull for instant power.

• **Convenient Smartphone Control**
  Easily monitor fuel level, power output, Eco Throttle® and much more, all from the palm of your hand. Built-in Bluetooth® connectivity teams with the exclusive Honda My Generator app for the ultimate in freedom and control.

• **Exceptional Fuel Efficiency**
  Long run times of up to 8.6 hours† means less time refueling and more time doing what you want.

• **Super Quiet Operation—54-58 dB(A)**
  With operating sound levels as low as a conversation, the Honda EU3200i keeps things quiet while you enjoy the peace.

• **Double Your Power**
  Parallel with another EU3200i for output as high as 6,400 watts.‡

• **Clean, Stable Power For Electronics**
  Honda Inverter Technology provides quality power for sensitive electronics.

• **Added Peace Of Mind**
  The CO-MINDER® system is designed to automatically shut down the generator if it detects carbon monoxide gas around the generator reaching unsafe levels.**

*Requires a smartphone download of the Honda My Generator application to begin use. **Depending on load. †Requires optional cable kit. ‡Requires a smartphone download of the Honda My Generator application to begin use. *Designed to power a single 13,500 BTU RV A/C or a single 15,000 BTU RV A/C with soft start.

NOT ALL MODELS AVAILABLE IN ALL STATES
EU | Super Quiet Series
RECREATIONAL USE, DIY & HOME BACKUP POWER

That’s enough to handle everything needed for any given load. The engine to run only as fast as
Eco Throttle® system, which enables and portable. EU models also boast
generators extremely lightweight
technology makes the EU model
Honda’s advanced inverter
projects, and home backup power. Plus, its fuel injected Honda engine makes for quick and easy 2-step chokeless starting.

All three EU2200i models, plus the EU3200i and EU7000is can be controlled remotely via Bluetooth® wireless technology using the Honda My Generator smartphone app for wireless stop or start-stop, operation monitoring, and service reminders, giving you the ultimate in freedom and convenience.

The All-New EU3200i

The EU7000is is our most technologically advanced and versatile generator yet. This fuel-injected powerhouse includes features such as 120V GFCI duplex receptacles, 30A 120V and 120/240V receptacles, push-button starting, Inverter Technology, Eco Throttle®, and a three-chamber muffler design for super-quiet operation.

Honda’s advanced inverter technology makes the EU model generators extremely lightweight and portable. EU models also boast great fuel efficiency thanks to the Eco Throttle® system, which enables the engine to run only as fast as needed for any given load.

The all-new EU3200i offers 3200 watts of robust power. That’s enough to handle everything from your RV’s A/C to your home back up essentials. With integrated upper and lower handles, the EU3200i generator is easy to lift, carry, and move—making it the perfect power partner for RVing, outdoor adventures, tailgating, DIY projects, and home backup power. Plus, its fuel injected Honda engine makes for quick and easy 2-step chokeless starting.

The EU2200i/Camo

EU2200i/Camo | 2200W (18.3A) 120V
- Runs up to 7 hrs. on 5.7 gals. of fuel
- Super quiet—52 to 58 dB(A)
- Advanced inverter technology provides reliable power to computers and other sensitive equipment
- 120V GFCI duplex receptacles, push-button starting,
Inverter Technology, Eco Throttle®, and a three-chamber muffler design for super-quiet operation.

EU2200i Companion

EU2200i Companion | 2200W (18.3A) 120V
- Built-in 30A receptacle
- Runs up to 8 hrs. on 0.95 gals. of fuel
- Smartphone control via the Honda My Generator app
- Fuel-Off switch for carburetor run dry
- Fuel Injection

EU3000is

EU3000is | 3000W (25A) 120V
- Conventional recoil key start makes starting quick and easy
- Built-in 30A receptacle
- Runs up to 11 hrs. on 1.4 gals. of fuel
- Super quiet—50 to 57 dB(A)
- Advanced inverter technology provides reliable power to computers and other sensitive equipment
- Oil Alert®, Overload Alarm, and Eco Throttle®

EU Series Features & Benefits

Portable
EU Series models are made for true portability, from easy-to-carry models with built-in handles to those with wheeled transport kits and folding handles.

Fuel Efficient
Honda’s superior technology, such as Eco Throttle®, results in increased fuel efficiency.

Double Your Power
Two identical wattage EU Series generators can be linked in parallel to increase available wattage through the generator easier.

Fuel On/Off Switch
All 2200-watt models feature a fuel shut-off valve which helps minimize side fuel issues and makes storing and transporting your generator easier.

Fuel Injection
Honda’s EU3200i and EU7000is models feature modern fuel injection, providing reliable power without fuel-related problems.

EU3200i

EU3200i | 3200W (26.7A) 120V
- Runs up to 6 hrs. on 1.2 gals. of fuel
- Super quiet—50 to 57 dB(A)
- Advanced inverter technology provides reliable power to computers and other sensitive equipment
- Oil Alert®, Overload Alarm, and Eco Throttle®

EU1000i

EU1000i | 1000W (8.3A) 120V
- Runs up to 6 hrs. on 0.6 gals. of fuel
- Super quiet—42 to 50 dB(A)
- Advanced inverter technology provides reliable power to computers and other sensitive equipment
- Oil Alert®, Overload Alarm, and Eco Throttle®

EU1000i Companion

EU1000i Companion | 1000W (8.3A) 120V
- Built-in 30A receptacle
- Runs up to 8 hrs. on 0.95 gals. of fuel
- Smartphone control via the Honda My Generator app
- Fuel-Off switch for carburetor run dry
Honda’s Economy Series generator is a reliable source of “no frills” power. It’s equipped with Oil Alert®, a protective steel frame, and like all Honda Generators, our advanced CO-MINDER® Carbon Monoxide Detection System.

The EG4000CL includes features such as 120V GFCI duplex receptacles, a convenient fuel gauge, a 120/240 volt selector switch, and centralized controls for ease of use. It also comes standard with Honda’s exclusive Digital Automatic Voltage Regulator (DAVR) that maintains voltage stability within a +/- 1% of 60Hz, thus protecting and optimizing the equipment being powered.

The Honda EG4000CL generator delivers the best of both worlds—reliability and cost savings—plus, the peace of mind of Honda’s advanced CO-MINDER® Carbon Monoxide Detection System.

Deluxe Series generators offer the right features for convenient, reliable backup power during outages & brownouts:’

EM5000SX and EM6500SX generators feature 120V GFCI duplex receptacles, simultaneous AC/DC use, wide handles for easy transporting, multiple front panel outlets for easy power connections, and electric start.

EM Series models can be controlled via Bluetooth® technology using the Honda My Generator smartphone app. They also include Honda’s proprietary iAVR power feature which minimizes voltage fluctuations and allows for increased wattage above the maximum rating for up to 10 seconds to start high amp load applications. It all adds up to quiet, durable, and efficient power like you’ve never experienced.

EG SERIES FEATURES & BENEFITS

- Oil Alert®: This feature protects the engine by shutting it down if oil level reaches an unsafe level.
- Circuit Protection: All circuits are protected from overload.
- Voltage Selector: Easily select between 120 or 240 volt operation. 120 volt mode allows generator’s full power to be available at all 120 volt receptacles.
- Large Fuel Tank: Large fuel tank with built-in fuel gauge provides up to 14.8 hours of operation on 6.3 gallons of fuel.*

EM SERIES FEATURES & BENEFITS

- Regulated Power: iAVR minimizes voltage fluctuations and allows for increased wattage above the max. rating for up to 10 secs. to start high amp load applications.
- Long Run Time: Auto Throttle® on EM Series generators delivers increased fuel efficiency, resulting in longer run times.
- AC/DC: Deluxe Series generators feature simultaneous AC and 120V DC vehicle battery charging. (Requires optional cable.)
- Voltage Selector: Easily select between 120 or 240 volt operation. 120 volt mode allows generator’s full power to be available at all 120 volt receptacles.

*Never use a generator in an enclosed or even partially enclosed area. Generator exhaust contains odorless, poisonous carbon monoxide gas that can cause unconsciousness or death. Requires a smartphone downloaded of the Honda My Generator app to be used. Depending on load. Honda’s legendary Industrial Series generators have earned a reputation in the construction and rental industries for their incredibly rugged reliability.

The EB2200i brings advanced inverter power to the site in a lightweight and super quiet package. Honda’s inverter technology produces reliable power for sensitive equipment and electronics.

Honda’s legendary Industrial Series generators have earned a reputation in the construction and rental industries for their incredibly rugged reliability.

The EB2200i brings advanced inverter power to the site in a lightweight and super quiet package. Honda’s inverter technology produces reliable power for sensitive equipment and electronics.

Honda EB5000X and EB6500X models are powered by Honda’s technologically-advanced commercial-grade iGX engines for an even higher standard of performance, and they include the proprietary iAVR power feature which minimizes voltage fluctuations and allows for increased wattage above the maximum rating for up to 10 seconds to start high amp load applications.

The EB10000 model offers industrial-strength power, electric starting, seven receptacles for easy connection of multiple tools, and includes Honda’s i-Monitor LCD readout for performance monitoring and diagnostics.

All EB Series models have full generator GFCI and neutral bond protection for OSHA-regulated job sites, are equipped with a USDA-qualified spark arrestor/muffler, and come standard with Honda’s CO-MINDER® Carbon Monoxide Detection System for added peace of mind.

EB2200i | 2200W (18.3A) 120V
- Runs up to 8.1 hrs. on 0.95 gals. of fuel*
- Super quiet—48 to 57 dB(A)
- Advanced inverter technology provides reliable power to computers and other sensitive equipment
- Oil Alert, Overload Alarm, and Eco Throttle

EB5000X | 5000W (41.6/20.8A) 120/240V
- Honda iGX commercial-grade engine with Oil Alert*
- Runs up to 10.5 hrs. on 6.2 gals. of fuel*
- Honda exclusive iAVR for 7000 watts up to 10 seconds to start larger equipment
- 120/240V selector switch
- Wheel kit standard with positive lock folding handles
- Hanger lifting eye standard
- GFCI / neutral bond protection

EB6500X | 6500W (54.1/27.0A) 120/240V
- Honda iGX commercial-grade engine with Oil Alert*
- Runs up to 9.8 hrs. on 6.2 gals. of fuel*
- Honda exclusive iAVR for 7000 watts up to 10 seconds to start larger equipment
- 120/240V selector switch
- Wheel kit standard with positive lock folding handles
- Hanger lifting eye standard
- GFCI / neutral bond protection

EB10000 | 10000W (83.8/41.7A) 120/240V
- Convenient electric start makes starting quick and easy
- Runs up to 7.9 hrs. on 8.2 gals. of fuel
- Honda exclusive Digital Automatic Voltage Regulator (DAVR)
- i-Monitor LCD for performance monitoring and diagnostics
- Standard wheel kit with folding handles and hanger kit

Regulated Power
iAVR minimizes voltage fluctuations and allows for increased wattage above the max. rating for up to 10 secs. to start high amp load applications.

Voltage Selector
Easily select between 120 or 240 volt operation. 120 volt mode allows generator’s full power to be available at all 120 volt receptacles.

GFCI & Neutral Bond
EB Series generators are OSHA compliant with neutral bond and full generator GFCI (Ground Fault Circuit Interrupter) circuit protection on all receptacles.

Standard Lift Hooks
EB5000X, EB6500X, and EB10000 models come standard with lift hooks for added jobsite security.

Folding Handles
EB5000X and EB6500X models feature a unique push button folding handle system that offers a smaller overall footprint for convenient transport and storage.
When Quiet Counts, Count on Honda.

Many of today’s applications for generators require quiet operation. Whether you’re using your generator for home backup power or taking along one of our lightweight models for a camping trip, you can count on Honda to provide one of the quietest sources of portable power around. Thanks to the use of inherently quiet OHV engines and quality construction, Honda EU Series generators boast incredibly low sound levels. The chart below compares the noise level of Honda Generators to a variety of common sounds we’re exposed to every day.

Looking for a Premier Level of Customer Service from Your Honda Dealer?
Now You Have It.

With the new Honda Premier Service and Honda Premier Dealership designations, we’re making it even easier to find the best local dealers for Honda Power Equipment sales, service, and support at powerequipment.honda.com/dealer-locator. Visit our website anytime to search for the dealer nearest you — from our network of more than 3,000 authorized Honda dealers nationwide — and see the latest information on equipment and accessories.

Why choose a Honda Premier Service dealer?
Honda Premier Service dealers meet the highest customer satisfaction standards for Honda warranty, service and parts — no matter where you purchased your Honda product. You can always count on a Honda Premier Service Dealer to:

- Be responsive and professional
- Have highly trained service technicians who have gone through Honda’s exclusive Honda Power Training curriculum
- Have the necessary tools to get the job done right
- Complete warranty repairs within 10 calendar days of the order

Why choose a Honda Premier Dealership?
In addition to meeting the superior warranty, service and parts standards of a Honda Premier Service dealer, these dealerships perform at the highest level and have attained the highest standards by providing the best overall customer experience set by Honda. Honda Premier Dealerships provide the best overall customer experience through:

- Additional Premier Performance training for their staff
- Superior product knowledge to help with all your purchases
- Participation in all sales programs as well as other business standards

For the highest quality in sales and service support look for the Honda Premier Service and Honda Premier Dealerships in your area or find them online at powerequipment.honda.com/dealer-locator.

Transfer Switches
Transfer switches allow a safe connection from a generator to a household/commercial electrical system. The transfer switch isolates the generator, so it can’t accidentally electrify external power wires.

**TRANSFER SWITCHES**

<table>

</tbody>
</table>

Note: Kits D & E permit relocating the flanged 30A inlet from the power inlet box to the transfer switch for direct cord-connection to the transfer switch.

Appliance Load Tester
A hand-held ammeter/wattmeter for measuring loads on cord-connected tools, appliances or lighting. A slide switch on the side of the unit allows you to choose amps or watts to appear on the LCD. UL listed.

Cord Sets
Cord sets provide easy and safe connections to an inlet box or transfer switch.

**Standard 125/250V Cord Sets (Twist-Lock)**

</tbody>
</table>

**Power Inlet Boxes**

Inlet boxes are mounted on the exterior of the house to avoid running a power cord through a door or window.

**Power Inlet Boxes (Bottom Inlet)**
