

HONDA

Visit us at gen.honda.com.

For Honda Generators warranty information, please visit powerequipment.honda.com/support/warranty. Please read the owner's manual before operating your Honda Power Equipment and never use in an enclosed or partially enclosed area where you could be exposed to odorless, poisonous carbon monoxide. Connection of a generator to house power requires a transfer device to avoid possible injury to power company personnel. Consult a qualified electrician. Specifications subject to change without notice.

HONDA

Portable Generators

The Honda **Advantage**

GENUINE

HONDA

Clockwise From Above: Honda Talon 1000X-4 Honda Ridgeline Sport Honda CRF450R Honda Accord Hybrid Honda BF250 **Outboard Engines**

There are a lot of reasons to insist on genuine Honda Generators. That's because at the heart of every one of Honda's gas-powered portable generators you'll find a legendary Honda four-stroke engine. As the world's largest engine manufacturer, Honda offers more engine experience than anyone. Experience born and tested on racetracks and roadways around the globe. Experience that continuously keeps us on the cutting edge. From automobiles, motorcycles, and all-terrain vehicles to marine engines, general-purpose engines, and power equipment products, Honda is committed to designing products that meet or exceed the demands of our customers.

Throughout our history, Honda has been dedicated to technological and environmental innovation, and today is no different. We continue to work hard to build our reputation for unsurpassed quality, performance, and reliability. It's a reputation worth considering the next time you're in the market for a portable generator.

Powered by World-Famous Honda Engines.

All Honda Generators feature either our Honda GX or iGX engines. These four-stroke engines are recognized as the industry leader in providing reliable, quiet, fuel-efficient power, plus legendary Honda reliability.

The New Honda GX130: A High Output Engine **Built for High Output Lifestyles.**

Honda's all-new EU3200i generator offers 3200 watts of power in a compact, easy-to-move package weighing only 59.1 lbs. The secret is in the powerful Honda GX130 engine. It's the world's first high output generator engine giving you the power to do more, without sacrificing portability.

- Purpose built compact and lightweight engine
- Improved cooling for lasting engine performance
- 7% more displacement than the EU2200i engine
- 45% more electrical power than the EU2200i

Honda iGX Engines Take Intelligence to a Whole New Level.

Honda's innovative iGX Series, a generation of intelligent computer-controlled engines, are on Honda EM and EB Series 5000 watt and 6500 watt generators.

The iGX models employ a digital CDI ignition system to dramatically improve ignition timing. They also feature an integrated electronic control unit (ECU) that communicates with a self-tuning regulator

(STR) governor system, which allows the engine to communicate with the generator it is powering. As the engine becomes intelligent, operation is automated and control becomes more precise, faster, and easier. Thus delivering exactly what you've always wanted: optimal performance.

Wherever You Need It, Honda Has the Power to Keep You Going.

For WOrk.

Why are Honda Generators number one on the job?
That's easy—Honda's renown reliability and durability.
On construction sites, time is money; crews can't afford to be idle due to a lack of on-site power.
Minimal downtime plus maximum dependability equals the most productive jobsites.

For home.

When the lights go out, it's more than just an inconvenience. Power outages can also result in financial loss due to spoiled food, lost work time, frozen water pipes, and the damage to the building and property that follows. A quiet, reliable Honda generator can easily help give you peace of mind through power-related emergencies. It can also be used to charge your 12-volt car battery.

For play.

For camping and RV power, Honda portable power is the perfect way to enjoy the great outdoors with all the comforts of home. Portable generators are also ideal for outdoor events like concerts, races, parties, tailgating, and more. That's why Honda Generators is the official supplier of INDYCAR™ and the first choice of many race teams and race tracks for their portable power needs.

Super Quiet Series (Pages 14-15)

EU Series generators represent the leading edge of portable power technology. Ranging from 1000 to 7000 watts, these totally enclosed, super quiet generators are ideal for recreational and home backup applications.

Economy Series (Page 16)

The 4000 watt **EG Series** generator is ideal for residential and DIY use, and offers legendary Honda reliability with a simple approach to your power needs.

Deluxe Series (Page 17)

EM Series generators with electric start are available in 5000 and 6500 watt models and offer a wide variety of enhanced functions for home backup and general purpose situations.

Industrial Series (Pages 18-19)

EB Series generators range from 2200 to 10000 watts of industrial strength power. They have earned a reputation in the construction and rental industries for their rugged reliability.

FEATURES & BENEFITS

Reliable

Honda has an unmatched reputation for reliable generators that offer dependable starts and keep on running year after year.

Fuel Efficient

Honda's superior technology, with features such as Eco Throttle® and Auto Throttle® means increased fuel efficiency and longer run times.

Quiet

Thanks to the use of inherently quiet four-stroke engines and superior technology, Honda Generators boast incredibly low decibel levels.

Portable

Honda Generators are made for true portability, from lightweight, easy-to-carry models, to those with built-in wheels & handles, to optional transport kits.

Clean Power

Consistent delivery of clean power is possible with technologies such as Inverter, DAVR, and iAVR voltage regulating systems.

Honda Generator Technology

Inverter Technology

Stable, clean power in a smaller, lighter package.

Computers and electrically-sensitive equipment require what is referred to as "clean power." Clean power is electrical current that is consistent and has a stable sine wave or signal. If the lights or other basic appliances in your home were being powered by a generator and there was a fluctuation in the AC power, you'd probably see the lights flicker—no problem! However, the same fluctuation can cause a power interruption that results in a loss of valuable work on your computer.

While all Honda Generators provide stable power, Honda engineers developed a revolutionary form of inverter technology. This process takes the raw power produced by the generator and passes it through a special microprocessor. This means you can operate a computer or other sensitive equipment from a remote location with even less possibility of interrupted service or damage to the equipment.

Using inverter technology, Honda engineers have integrated parts from the engine and generator set, resulting in a more compact and lighter product that is purpose-built to make clean, reliable power.

Eco Throttle[®] System

Fuel economy and quiet operation are standard.

Eco Throttle[®] automatically adjusts engine speed to the optimum level, given the usage load, through a load-dependent, electric governor. This not only results in excellent fuel economy, but also makes a quiet generator even quieter. Eco Throttle[®] is standard on all inverter models.

Automatic Voltage Regulation

Consistent delivery of power under different loads.

The EG4000CL and EB10000 feature a DAVR (Digital Automatic Voltage Regulator) designed to hold the voltage stability within a +/- 1% change during operation to which the U.S. standard is 60Hz.

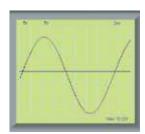

EM and EB Series 5000 and 6500 watt models offer a proprietary Honda technology, iAVR (Intelligent Automatic Voltage Regulator). This consists of a digital capacitive discharge ignition, a self-tuning electronic governor, a current transformer applied to the Auto Throttle and the AVR control unit. iAVR lets the generator operate well above its maximum rating for up to 10 seconds to start high initial amp draw situations. This ensures a consistent flow of power and translates into protection for sensitive equipment and reliable power for you.

Fuel Injection Technology

For maximum fuel efficiency and increased reliability.

EU3200i and EU7000is models provide super quiet, portable electronic fuel injection power suitable for various applications. Smart electronic fuel injection technology means reliable operation and reduces potential fuel problems while increasing fuel efficiency.

Honda offers consistent delivery of clean power.

Inverter technology is available on eight Honda Generators, designated by an "i" after the model number.

Fco Throttle® is standard on all

The iAVR Advantage

7000 watts for up to 10 seconds on EB Series and EM Series 5000 and 6500 watt model generators.

Electronic fuel injection is available on EU3200i and EU7000is models.

CO-MINDER® CARBON MONOXIDE (CO) DETECTION SYSTEM

Safety for everyone.

At Honda, we care about safety. Everybody's safety. As a leader in the portable generator industry, product safety has always been, and always will be, a top priority. That is why all Honda portable generators are equipped with our advanced CO-MINDER® carbon monoxide (CO) detection system. This function aids in reducing the risk of injury or fatality due to accidental carbon monoxide poisoning.

The CO-MINDER® system is designed to continuously measure CO levels near the generator, and automatically shut down the generator if detected carbon monoxide levels are too high. The sensor is designed to automatically test itself, and has a built-in warning that alerts the customer to replace the sensor prior to its end of life. CO-MINDER® sensors conform to UL standards and are moisture and dust resistant.

CO-MINDER° is designed to help ensure that everyone who operates a Honda generator can do so with confidence, providing users, friends, and families with added peace of mind.

As a leader in the portable generator industry, Honda is proud to be the industry's first manufacturer to install CO detection devices on 100% of our generators.

- Continuously measures CO levels around the operating generator
- · Designed to automatically shut down the generator if CO levels become too high
- Designed to automatically test itself. and alerts customer to replace sensor, when necessary
- Moisture and dust resistant
- Helps provide confident operation and peace of mind
- Available on all Honda Generators

Honda My Generator App

Putting the power of Honda Generators in the palm of your hand.

The exclusive *Honda My Generator* smartphone app, paired with built-in *Bluetooth** connectivity on select Honda generator models, offers remote generator operation and monitoring with impressive performance, unmatched convenience, and a host of other benefits.

Honda My Generator monitors and reports a range of information, such as output power, engine operating hours, oil life, and on the EU3200i and EU7000is, fuel level. It also issues maintenance reminders and alerts, including if a generator is shut down by CO-MINDER.®

Honda My Generator gives the user the ability to control stop or start-stop functionality, monitors the Eco Throttle® fuel-efficiency feature on specific models, and allows control of multiple compatible Honda Generators with a single app.

*Never run a generator in an enclosed or even partially enclosed area. Generator exhaust contains odorless, poisonous carbon monoxide gas that can cause unconsciousness or death. †Requires a smartphone

download of the Honda My Generator application to begin use. ‡App features and functionality vary based on specific compatible Honda generator models. The Bluetooth® word mark and logos are registered

trademarks owned by Bluetooth SIG, Inc. and any use of such marks by American Honda Motor Co., Inc. is under license. Other trademarks and trade names are those of their respective owners

Select Honda Generators can be controlled remotely with the Honda My Generator app for wireless stop or start-stop, operation monitoring, service reminders, and more

MODELS FEATURING BLUETOOTH' TECHNOLOGY

(Page 17)

Safe Use of Portable Generators for Home Backup Power.

While portable power is ideally distributed through a professionally installed transfer switch, homeowners can easily and safely use a smaller output portable generator to power essential home appliances.*

Power management tips

During power outages, the first priority is to provide sufficient light for the safety of your family. If power is out for several hours, you will want to power your refrigerator and freezer to ensure that no food spoilage occurs. Remember that it is not necessary to continually power these appliances if your generator has a small power output. Power management will allow you to utilize a small generator to power several appliances safely.

Portable generators over 2000 watts can be used to power microwave ovens, toaster ovens, and other electrical cooking devices for meal preparation.

The Honda EU3000is and EU3200i are ideal generators to power lights and multiple appliances, not requiring 240V power, all at the same time.

Honda EM5000SX. EM6500SX. and EU7000is models are great choices for homeowners

with larger power requirements such as deep well water pumps and electric vehicle charging. All of these models are well-suited for use with

> a transfer switch to power priority circuits in your home. A qualified electrician should professionally install any home backup system utilizing a portable generator and manual or automatic transfer switch. Contact your Authorized Honda Power Equipment Dealer or qualified electrician to help determine the best backup power options for your home.

Once you master the art of "power management," you will discover that a smaller portable generator can safely provide many of the conveniences you count on every day. And when the power comes back on, you will be able use your portable Honda generator for many other applications around the home, plus DIY projects, camping, RVing, outdoor events, and for tailgating before the big game.

TRANSFER SWITCH

What is a Transfer Switch?

A transfer switch installs near your circuit panel, safely separating generator power from utility power, and provides a safe way to connect and use a generator with selected circuits inside your home or building. It's also essential to prevent power from energizing lines outside your home where power company workers might be performing service.

Honda offers two types of transfer switches, manual and "smart." Both work with a single, heavy-duty cable to connect the generator to the house or building. Manual types can transfer power with a large, single master breaker, and other versions use individual breakers. The "smart" switch or UTS (Universal Transfer Switch) is a digitally-controlled and programmable system. After being connected to the generator, the UTS will manage

available power to priority applications allowing a smaller generator to power more critical applications in your home. Its key feature is automatic load shedding, which lets you set which circuits have priority. For additional information on UTS transfer switches and the **Honda HP²S** home backup systems, visit our website at gen.honda.com.

UTS (Universal Transfer Switch) by American Power Conversion

Why a Transfer Switch?

Often required by local electrical codes, a transfer switch provides a safe and convenient method of connecting an outdoor portable generator to a home or building. A transfer switch completely isolates the generator's power to selected circuits. This prevents the generator's power from going outside the house or building, which could damage property and possibly injure or kill power company workers servicing nearby lines.

Ask your Honda Dealer to help you select the most efficient model for your power needs.

NOTE: Check your equipment or appliance for actual wattage requirements.

Generator **Selection Guide**

Need some help deciding which Honda generator will best meet your needs? Use our Generator Selection Guide to help narrow your choices to 2-3 models. These estimates will meet most user's needs, but be sure to check your individual appliances for their actual wattage requirements. You can get a better estimate on a variety of tools and appliances using the chart on page 9. It's also a smart idea to discuss your choice with your Authorized Honda Power Equipment Dealer.

HOME (HOME BACKUP POWER)

1) Estimate your wattage requirements.

What kind of water, furnace, and hot water heater do you have?

- Utility water; gas, oil, or LP furnace; gas, oil, or LP hot water heater: You can power your home with a 3000-4000 watt generator. You could also consider choosing a smaller generator, like the EU2200i, to handle basics like the refrigerator, TV, microwave, and lights.
- Well water; electric hot water heater; gas, oil, or LP furnace: You need a 5000-7000 watt generator with 120/240V capability.

What combination of features and value is right for you?

- **EG Series:** Reliable power at an economical price
- EM Series: Adds additional features, including electric start, wheel kit, and more
- EU Series: Adds even more features, like super quiet operation, inverter quality power, and longer run time

3) Combine series and wattage together to find the best models for your needs.

For example, if you need 5000-7000 watts, and prefer the conveniences of electric starting and a built-in wheel kit, consider the EM5000SX, EM6500SX, or EU7000is.

1) Estimate your wattage requirements.

How will you be using the generator?

- Camping: small appliances (Lights, Fan, Computer, Battery Charging)-1000-2200 watts
- Camping or tailgating: medium appliances (Microwave, Hairdryer)–2200-3200 watts
- RV 1 A/C unit (up to 13,500 BTU): 3000-4000 watts
- RV 2 A/C units: 6500-7000 watts

2) Decide on a series.

What combination of features and value is right for you?

- **EG Series:** Reliable power at an economical price
- EU Series: Adds even more features, like super quiet operation, inverter quality power, and longer run time

3) Combine series and wattage together to find the best models for your needs.

For example, if your wattage is 3000-3200 watts, and you want to power most single 13,500 BTU RV air conditioners plus additional appliances, consider the EU3200i.

PLAY (RECREATIONAL USE, SUCH AS RV POWER, TAILGATING, OR CAMPING)

WORK (INDUSTRIAL & CONSTRUCTION APPLICATIONS OR DIY PROJECTS)

1) Estimate your wattage requirements.

How many tools will you be powering at once?

- 1 tool: between 1000-2200 watts
- 2 tools: between 2200-4000 watts
- Multiple tools: 4000 watts and up

2) Decide on a series.

What combination of features and value is right for you?

- **EG Series:** Reliable power at an economical price
- EB Series: Adds additional features, including OSHA requirements, wheel kit, and more
- EU Series: Adds even more features, like super quiet operation, inverter quality power, and longer run time

3) Combine series and wattage together to find the best models for your needs.

For example, if your wattage is 2000-2200 watts, and you prefer the convenience of a quiet and lightweight generator, consider the EB2200i.

Bring out the outdoor enthusiast in you with the all-new Honda EU3200i. Delivering more power and more convenience in a compact, portable package, its robust 3200 watts is what you need to run most 13,500 BTU RV A/C units*—plus lights, appliances, and more. The EU3200i offers a range of conveniences, including quick and easy 2-step starting, the freedom of remote smartphone control, exceptional fuel efficiency with long run times, and integrated upper and lower handles for easy lifting, moving, and storing.

EU3200i Features:

• 3200 Watts **Of Portable Power**

3200 maximum watts of reliable power runs most 13,500 BTU RV A/C units*plus lights, appliances, and more!

Compact & **Lightweight Design**

At only 59.1 pounds, it's portable, packable, and is equipped with integrated upper and lower handles to assist transporting.

Easy Starts & **Simple Operation**

Quick and easy 2-step chokeless starting thanks to its fuel-injected Honda engine: just turn on and pull for instant power.

Convenient **Smartphone Control**

Easily monitor fuel level, power output, Eco Throttle® and much more, all from the palm of your hand. Built-in **Bluetooth**° connectivity teams with the exclusive **Honda My Generator** app* for the ultimate in freedom and control.

Exceptional Fuel Efficiency

Long run times of up to 8.6 hours* means less time refueling and more time doing what you want.

Super Quiet Operation-54-58 dB(A)

With operating sound levels as low as a conversation, the Honda EU3200i keeps things quiet while you enjoy the peace.

Double Your Power

Parallel with another EU3200i for output as high as 6,400 watts.*

Clean. Stable Power **For Electronics**

Honda Inverter Technology provides quality power for sensitive electronics.

Added Peace Of Mind

The CO-MINDER® system is designed to automatically shut down the generator if it detects carbon monoxide gas around the generator reaching unsafe levels."

Our **Super Quiet Series** generators feature a totally enclosed body that results in noticeably quieter performance. Designed for the ultimate in quality, portability, and convenience, these models are perfect for any trip to the great outdoors or any situation where quiet operation is critical.

Honda's advanced inverter technology makes the EU model generators extremely lightweight and portable. EU models also boast great fuel efficiency thanks to the Eco Throttle® system, which enables the engine to run only as fast as needed for any given load.

The all-new EU3200i offers 3200 watts of robust power. That's enough to handle everything from your RV's A/C* to your home back up essentials. With integrated

upper and lower handles, the EU3200i generator is easy to lift, carry, and move—making it the perfect power partner for RVing, outdoor adventures, tailgating, DIY projects, and home backup power. Plus, its fuel injected Honda engine makes for quick and easy 2-step chokeless starting.

The All-New EU3200i

The **EU7000is** is our most technologically advanced and versatile generator yet. This fuelinjected powerhouse includes features such as 120V GFCI duplex receptacles, 30A 120V and 120/240V receptacles, push-button starting, Inverter Technology, Eco Throttle, and a three-chamber muffler design for super-quiet operation.

All three EU2200i models, plus the EU3200i and EU7000is can be

controlled remotely via **Bluetooth**® wireless technology using the Honda My Generator smartphone app[†] for wireless stop or startstop, operation monitoring, and service reminders, giving you the ultimate in freedom and convenience.

Honda Mv Generator smartphone app

- Runs up to 8.1 hrs. on 0.95 gals. of fuel*
- Super quiet—48 to 57 dB(A)
- Lightweight—less than 48 lbs. • Smartphone control via the Honda My Generator app
- Fuel-Off switch for carburetor run dry
- REALTREE EDGE® camo model exterior blends into natural environments

EU2200i Companion | 2200W (18.3A) 120V

- Built-in 30A receptacle
- Runs up to 8.1 hrs. on 0.95 gals. of fuel*
- Super quiet—48 to 57 dB(A)
- Lightweight—less than 48 lbs.
- Smartphone control via the *Honda My Generator* app
- Fuel-Off switch for carburetor run dry

EU3000is | 3000W (25A) 120V

- Convenient electric key start makes starting quick and easy
- Built-in 30A receptacle
- Runs up to 19.6 hrs. on 3.4 gals. of fuel*
- Super quiet—50 to 57 dB(A)
- Advanced inverter technology provides reliable power to computers and other sensitive equipment
- Oil Alert[®], Overload Alarm, and Eco Throttle[®]

EU3200i | 3200W (26.7A) 120V

- Runs up to 8.6 hrs. on 1.2 gals. of fuel*
- Super quiet—54 to 58 dB(A)
- Lightweight—less than 60 lbs.
- Quick, 2-step chokeless starting • Fuel injected Honda engine—no carburetor
- Smartphone control via the *Honda My Generator* app
- Built-in LED display with fuel gauge and more
- Built-in 30A receptacle

EU7000is | 7000W (58.3/29.1A) 120/240V

- Convenient push button electric start makes starting quick and easy
- Runs up to 16 hrs. on 5.1 gals. of fuel*

 - Super quiet—52 to 58 dB(A) • Fuel injected Honda engine—no carburetor
 - Smartphone control via the *Honda My Generator* app

 - *i*-Monitor LCD for performance monitoring and diagnostics

EU SERIES FEATURES & BENEFITS

Portable

EU Series models are made for true portability, from easy-to-carry models with built-in handles to those with wheeled transport kits and folding handles.

Fuel Efficient

Honda's superior technology, such as Eco Throttle," results in increased fuel efficiency.

Double Your Power

Two identical wattage EU Series generators can be linked in parallel to increase available wattage through the generator outlets.*

Fuel On/Off Switch

All 2200-watt models feature a fuel shutoff valve which helps minimize stale fuel issues and makes storing and transporting your generator easier.

Fuel Injection

Honda's EU3200i and EU7000is models feature modern fuel injection, providing reliable power without fuel-related problems.

EG4000CL | 4000W (33.3/16.6A) 120/240V

- Honda GX commercial-grade engine with Oil Alert®
- Runs up to 14.8 hrs. on 6.3 gals. of fuel*
- Honda exclusive Digital Automatic Voltage Regulator (DAVR)
- AC circuit breaker/protectors
- 120/240V selector switch
- · Built-in fuel gauge

Honda's **Economy Series** generator is a reliable source of "no frills" power. It's equipped with Oil Alert, a protective steel frame, and like all Honda Generators, our advanced CO-MINDER® Carbon Monoxide Detection System.

The **EG4000CL** includes features such as 120V GFCI duplex receptacles, a convenient fuel gauge, a 120/240 volt selector switch, and centralized controls for ease of use.

It also comes standard with Honda's exclusive Digital Automatic Voltage Regulator (DAVR) that maintains voltage stability within a +/- 1% of 60Hz, thus protecting and optimizing the equipment being powered.

The Honda EG4000CL generator delivers the best of both worlds—reliability and cost savings—plus, the peace of mind of Honda's advanced CO-MINDER® Carbon Monoxide Detection System.

CO-MINDER

EM | Deluxe Series **HOME BACKUP POWER**

Deluxe Series generators offer the right features for convenient, reliable backup power during outages & brownouts.

EM5000SX and EM6500SX generators feature 120V GFCI duplex receptacles, simultaneous AC/DC use, wide handles for easy transporting, multiple front panel outlets for easy power connections, and electric start.

EM Series models can be controlled via Bluetooth® technology using the *Honda*

> Intelligent A uto

Voltage

Regulated Power

fluctuations and allows for

start high amp load applications.

iAVR minimizes voltage

My Generator smartphone app.[†]

They also include Honda's proprietary iAVR power feature which minimizes voltage fluctuations

and allows for increased wattage above the maximum rating for up to 10 seconds to start high amp load applications.

It all adds up to quiet, durable, and efficient power like you've never experienced.

EM5000SX | 5000W (41.6/20.8A) 120/240V

- Convenient electric start makes starting guick and easy
- Honda iGX commercial-grade engine with Oil Alert®
- Runs up to 10.8 hrs. on 6.2 gals. of fuel[‡]
- Smartphone control via the *Honda My Generator* app
- Honda exclusive iAVR for 7000 watts up to 10 seconds
- 120/240V selector switch

3125

smartphone app

EM6500SX | 6500W (54.1/27.0A) 120/240V

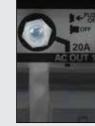

- Convenient electric start makes starting quick and easy
- Honda iGX commercial-grade engine with Oil Alert*
- Runs up to 9.8 hrs. on 6.2 gals. of fuel[‡]
- Smartphone control via the *Honda My Generator* app
- Honda exclusive iAVR for 7000 watts up to 10 seconds
- 120/240V selector switch

EG SERIES FEATURES & BENEFITS

Frame Protection The EG4000CL is equipped with a steel frame for added protection and durability.

This feature protects the engine by shutting it down if oil level reaches an unsafe level.

OIL ALERT

■ WHEN OIL LEVEL LOW ENGINE STOPS IMMEDIATELY

Circuit Protection All circuits are protected from overload.

Voltage Selector Easily select between 120 or 240 volt operation. 120 volt mode allows generator's full power to be available at all 120 volt receptacles.

Large Fuel Tank Large fuel tank with built-in fuel gauge provides up to 14.8 hours of operation on 6.3 gallons of fuel.

Long Run Time Auto Throttle® on EM Series increased wattage above the fuel efficiency, resulting in max. rating for up to 10 secs. to

American Honda Motor Co., Inc. is under license. Other trademarks and trade names are those of their respective owner

generators delivers increased longer run times.

EM SERIES FEATURES & BENEFITS

AC/DC **Deluxe Series generators** feature simultaneous AC and 12V DC vehicle battery charging. (Requires optional cable.)

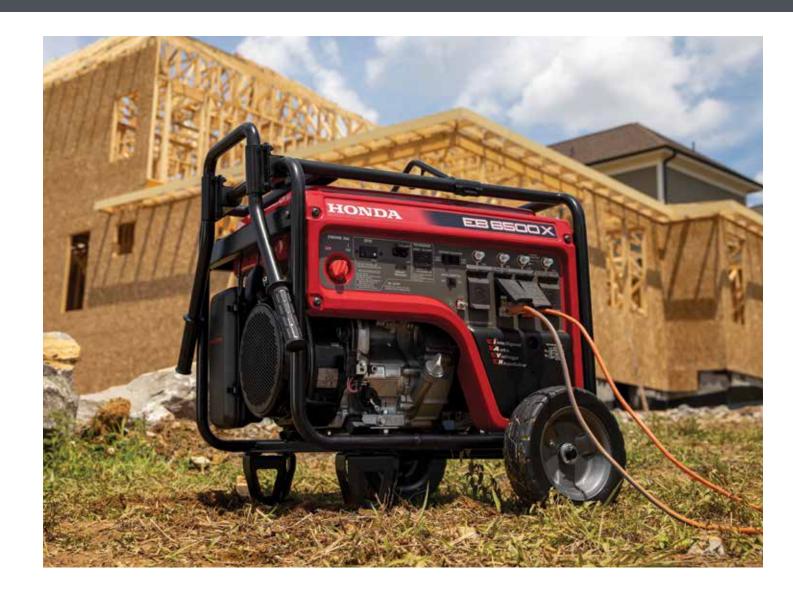

Voltage Selector Easily select between 120 or 240 volt operation. 120 volt mode allows generator's full power to be available at all 120 volt receptacles.

Folding Handles EM models come with easyto-use, push button folding handles that offer a smaller overall footprint for convenient transport and storage.

Honda's legendary Industrial **Series** generators have earned a reputation in the construction and rental industries for their incredibly rugged reliability.

The **EB2200i** brings advanced inverter power to the site in a lightweight and super quiet package. Honda's inverter technology produces reliable power for sensitive equipment and electronics.

Honda EB5000X and EB6500X models are powered by Honda's technologically-advanced commercial-grade iGX engines for an even higher standard of performance, and they include the proprietary iAVR power feature which minimizes voltage fluctuations and allows for increased wattage above the maximum rating for up to 10 seconds to start high amp load applications.

The **EB10000** model offers industrial-strength power, electric starting, seven receptacles for easy connection of multiple

tools, and includes Honda's i-Monitor LCD readout for performance monitoring and diagnostics.

All EB Series models have full generator GFCI and neutral bond protection for OSHA-regulated job sites, are equipped with a USDA-qualified spark arrestor/ muffler, and come standard with Honda's CO-MINDER® Carbon Monoxide Detection System for added peace of mind.

EB2200i | 2200W (18.3A) 120V

- Runs up to 8.1 hrs. on 0.95 gals. of fuel*
- Super quiet—48 to 57 dB(A)
- Lightweight—less than 48 lbs.
- Advanced inverter technology provides reliable power to computers and other sensitive equipment
- Oil Alert[®], Overload Alarm, and Eco Throttle[®]

EB5000X | 5000W (41.6/20.8A) 120/240V

- Honda iGX commercial-grade engine with Oil Alert®
- Runs up to 10.5 hrs. on 6.2 gals. of fuel*
- Honda exclusive iAVR for 7000 watts up to 10 seconds to start larger equipment
- 120/240V selector switch
- Wheel kit standard with positive lock folding handles
- Hanger kit/lifting eye standard
- GFCI / neutral bond protection

EB6500X | 6500W (54.1/27.0A) 120/240V

- Honda iGX commercial-grade engine with Oil Alert®
- Runs up to 9.8 hrs. on 6.2 gals. of fuel*
- Honda exclusive iAVR for 7000 watts up to 10 seconds to start larger equipment
- 120/240V selector switch
- Wheel kit standard with positive lock folding handles
- Hanger kit/lifting eye standard
- GFCI / neutral bond protection

EB10000 | 10000W (83.8/41.7A) 120/240V

- · Convenient electric start makes starting quick and easy
- Runs up to 7.9 hrs. on 8.2 gals. of fuel*
- Honda exclusive Digital Automatic Voltage Regulator (DAVR)
- *i*-Monitor LCD for performance monitoring and diagnostics
- Standard wheel kit with folding handles and hanger kit

EB SERIES FEATURES & BENEFITS

Regulated Power

iAVR minimizes voltage fluctuations and allows for increased wattage above the max. rating for up to 10 secs. to start high amp load applications.

Voltage Selector

Easily select between 120 or 240 volt operation. 120 volt mode allows generator's full power to be available at all 120 volt receptacles."

GFCI & Neutral Bond

EB Series generators are OSHA compliant with neutral bond and full generator GFCI (Ground Fault Circuit Interrupter) circuit protection on all receptacles.

Standard Lift Hooks

EB5000X, EB6500X, and EB10000 models come standard with lift hooks for added jobsite security.

Folding Handles

EB5000X and EB6500X models feature a unique push button folding handle system that offers a smaller overall footprint for convenient transport and storage.

When Quiet Counts, Count on Honda.

Many of today's applications for generators require quiet operation. Whether you're using your generator for home backup power or taking along one of our lightweight models for a camping trip, you can count on Honda to provide one of the quietest sources of portable power around. Thanks to the use of inherently quiet OHV engines and quality construction, Honda EU Series generators boast incredibly low sound levels. The chart below compares the noise level of Honda Generators to a variety of common sounds we're exposed to every day.

	Noise Level (in decibels)
Model Number	Noise Level (in decibels)
EB10000	71-73 dB(A) ⁻
EG4000CL	66-67 dB(A) [†]
EB6500X	64-67 dB(A) ⁻
EM6500SX	64-66 dB(A) ⁻
EM5000SX	63-66 dB(A) ⁻
EB5000X	63-65 dB(A) ⁻
EU3200i	54-58 dB(A) [;]
EU7000is	52-58 dB(A) [:]
EU3000is	50-57 dB(A) [;]
EB2200i	48-57 dB(A) [:]
EU2200i Companion	48-57 dB(A) [:]
EU2200i Camo	48-57 dB(A) [:]
EU2200i	48-57 dB(A) [:]
EU1000i	42-50 dB(A) [±]

Noise	Level Comparisons
	(in decibels)

	Loud
140	····· Threshold of Pain
130	····· Siren at 100 Feet ···· Jet Plane at 50 Feet

Quiet

Looking for a Premier Level of Customer Service from Your Honda Dealer? Now You Have It.

With the new Honda Premier Service and Honda Premier Dealership designations, we're making it even easier to find the best local dealers for Honda Power Equipment sales, service, and support at powerequipment.honda.com/dealer-locator.

Visit our website anytime to search for the

dealer nearest you — from our network of more than 3,000 authorized Honda dealers nationwide — and see the latest information on equipment and accessories.

Why choose a Honda Premier Service dealer?

Honda Premier Service dealers meet the highest customer satisfaction standards for Honda warranty, service and parts — no matter where you purchased your Honda product. You can always count on a Honda Premier Service Dealer to:

- · Be responsive and professional
- · Have highly trained service technicians who have gone through Honda's exclusive Honda Power Training curriculum
- Have the necessary tools to get the job done right
- Complete warranty repairs within 10 calendar days of the order

Why choose a Honda Premier Dealership?

In addition to meeting the superior warranty, service and parts standards of a Honda Premier Service dealer, these dealerships perform at the highest level and have attained the highest standards by providing the best overall customer experience set by Honda. Honda Premier Dealerships provide the best overall customer experience through:

- Additional Premier Performance training for their staff
- Superior product knowledge to help with all your purchases
- Participation in all sales programs as well as other business standards

For the highest quality in sales and service support look for the Honda Premier Service and Honda Premier Dealerships in your area or find them online at powerequipment.honda.com/dealer-locator.

Transfer Switches

Transfer switches allow a safe connection from a generator to a household/commercial electrical system. The transfer switch isolates the generator, so it can't accidentally electrify external power wires.

TRANSFER SWITCHES*

Style	Description	Max. Watts	Part Number
Α	15 Amp 1 Circuit Furnace Transfer Switch (5-15)	1875	32314-TF151W
С	50 Amp 12 Circuit Indoor Manual Transfer Switch	12500	32311-18950A
D	20 Amp 6 Circuit Automatic/Programmable UTS Switch	14400	32315-UTS6BI
D	30 Amp 6 Circuit Automatic/Programmable UTS Switch (L5-30/EU3)	3750	32316-UTS6H
D	30 Amp 10 Circuit Automatic/Programmable UTS Switch	24000	32315-UTS10BI
E	10-CIR PANEL/LINK® X, 30A (for EB series generators)	7500	32316-XRC1003AH

COMBINATION TRANSFER SWITCH KITS-HARDWIRE/PLUG-IN WITH 25' CORD SET AND INLET BOX*

Kit	Description	Max. Watts	Part Number
Kit D	30 Amp 8 Circuit Indoor Transfer Switch Kit**	7500	32313-30408-BHK25
Kit E	30 Amp 10 Circuit Indoor Transfer Switch Kit**	7500	32313-Q310-CHK25
Kit G	30 Amp, 120/240 Volt, 6 Circuit Indoor Transfer Switch Kit***	7500	32312-KIT3026NF25

Note: Kits D & E permit relocating the flanged 30A inlet from the power inlet box to the transfer switch for direct cord-connection to the transfer switch.

Appliance Load Tester

A hand-held ammeter/wattmeter for measuring loads on cord-connected tools, appliances or lighting. A slide switch on the side of the unit allows you to choose amps or watts to appear on the LCD. UL listed.

Description	Part Number
APPLIANCE LOAD TESTER (15A, 1875W)	32660-893-THP103

Cord Sets

Cord sets provide easy and safe connections to an inlet box or transfer switch.

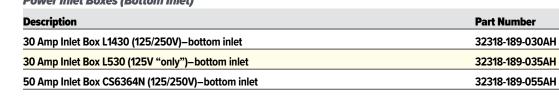

Standard 125/250V Cord Sets (Twist-Lock)

Description: Standard Cord Set	Part Number
12 gauge 4-wire, 20 Amp, 25 ft. (L1420) male & female ends	06580-124-025AH
12 gauge 4-wire, 20 Amp, 50 ft. (L1420) male & female ends	06580-124-050AH
10 gauge 4-wire, 30 Amp, 25 ft. (L1430) male & female ends	06583-104-025AH
6 gauge 4-wire, 50 Amp, 10 ft. (L6365/L6364) male & female ends	06580-064-010AH

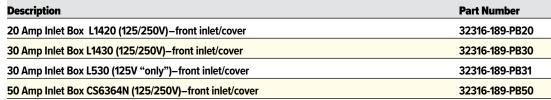

Power Inlet Boxes

Inlet boxes are mounted on the exterior of the house to avoid running a power cord through a door or window.

Power Inlet Boxes (Bottom Inlet)
