## GENUINE HONDA

There are many reasons to insist on genuine Honda Engines. As the world's largest engine manufacturer, Honda offers more engine experience than anyone. Experience born on racetracks and roadways around the globe. Experience that keeps us on the cutting edge of engine performance technology and crosses our entire product line. From automobiles, race cars, motorcycles and all-terrain vehicles to marine engines, power equipment products and general-purpose engines, Honda is committed to designing products that meet or exceed the demands of our customers across the board. Based on the wide variety of products offered with our Honda Engines, we're experts at matching the right engine for the right job and producing engines that will "get the job done."

Throughout our history, Honda has been dedicated to technological and environmental innovation, and today is no different. After all, we have a legendary reputation to live up to. A reputation for unsurpassed quality, performance and reliability. A reputation worth considering the next time you're in the market for an engine.

### **Net Power**

The SAE J1349 standard measures net horsepower with the manufacturer's production muffler and air cleaner in place. Net horsepower more closely correlates with the power the operator will experience when using a Honda Engine powered product. The power rating of the engines indicated in this document is the net power output tested on a production engine for the model noted and measured at the rpm specified. Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operation speed of the engine in application, environmental conditions, maintenance and other variables.

Honda GX Series Engines carry a 3-Year Warranty.<sup>\*</sup> You always knew they were worry free, but now we've put it in writing.

\*Warranty applies to all Honda GX Series engines, 100cc or larger purchased at retail or put into rental service since January 1, 2009. Warranty excludes Honda GXV140 and GXV160 models. See full warranty details at engines.honda.com.

## **Honda takes intelligence** to a whole new level.

Honda's innovative iGX Series engines are a new generation of intelligent computer-controlled general purpose engines. Honda iGX engines feature an integrated ECU (electronic control unit) with a self-tuning regulator (STR) governor system that allows the engine to communicate with the machine it is powering to achieve optimal performance. The ECU enables drive-by-wire remote control operation of the engine's regulating functions such as starting, throttle, ignition timing and diagnostics. Therefore, engine speed can be programmed and varied based on the equipment application's load and speed requirement.

With their multi-function design, iGX engines are the ultimate choice for complex commercial and residential power equipment applications.
