GENERATORS

Battery Tray Kits & Batteries and DC Charging Cords

Battery Tray Kits & Batteries

Some Honda generators are recoil start, but the models listed below require just a battery and battery tray kit to add electric start. Our battery tray kit is an all-steel, bolt-on kit. Note: We recommend using a battery tender when storing.

Model	Battery Tray Kit	Battery	
EM3500SX, EM3500SXX1, EM5000SX	08020-ZB410AH	Group 51, Commercially Available	
EM3800SX, EM5000SXX2, EM6500SXX1	06550-Z22-A30AH	Group 51R Commercially Available	

DC Charging Cords

If your Honda generator has DC output, use one of these special cords to charge batteries. All have alligator clips on one end, and are 6 or 10 feet long.

Model	Plug Style	Part No	
EB3000CKAG, EM3000C, EU1000i, EU2000i, EU2200i, EU3000i, EU3000is, EX700c (not compatible with EU2000i/EU2200i companion models or models equipped with CO-MINDER (carbon monoxide detection system)) (10' long)	B	32660-894-BCX12H (Reliance)	
All other models with DC output (excludes models equipped with CO-MINDER (carbon monoxide detection system))	C	32650-825-015	

GENERATORS

Breather Heater Kits

Honda has developed a small, 10-watt heating coil that fits inside the crankcase breather tube to prevent water from freezing inside the crankcase breather tube due to extreme cold weather. If ice forms in the breather tube, it can block the airflow causing the generator to not work properly and/or leak oil. The heating coil gets its power from the generator by connecting to the back terminal of a selected receptacle. Each kit is unique to a specific generator, and some come with special insulated parts to help regulate the temperature. Once installed, the cold weather kit may remain on the generator; it is okay for it to operate year-round.

Plugs and Connectors

Plugs and connectors are available for a range of applications, from 15A~50A and 125/250V AC configurations. The application table below lists generator/welder models and the plug styles they use.

Plugs (male) fit the matching receptacle on the generator. Most plugs are rugged nylon construction with heavy-duty screw terminals.

Connectors (female) are used on the ends of cords and are required to connect a generator to a transfer switch.

Wireless Start/Stop Remote Control for EU7000is

This wireless remote starter kit allows you to start and stop your generator with the fob transmitter or your smartphone. The kit includes the receiving unit, key fob transmitter remote, zip tie, and a detailed instruction and quick start guide.

Only applies to frame serial numbers EEJD-1000001 through EEJD-1299999.

Does not apply to serial numbers EEJD-1300001 and above. These units have built-in wireless start/stop functionality.

(1) When connecting EB series generators to a transfer switch, please refer to Generator Service Bulletin #20.

* California Standard

Note: EB2000i, EB2200i, and EB2800i generators are not compatible with any available transfer switches at this time.

GENERATORS

Transfer Switches & Kits

Transfer switches isolate the generator, allowing a safe connection so it can't accidentally electrify external power wires. Transfer switches and inlet boxes must be installed by a qualified electrician and the connection must comply with all applicable laws and electrical codes.

Transfer Switch Description	Max Watts	NEMA	Part No	Image
APC				
20 Amp, 6-circuit, universal	5000	L14-20	32315-UTS6BI*	
30 Amp, 6-circuit, universal (EU3) ⁽¹⁾	3750	L5-30	32316-UTS6H*	
30 Amp, 10-circuit, universal (20A max circuits) ^{(1) (2)}	7500	L14-30	32315-UTS10BI*	
⁽¹⁾ These transfer switches offer adaptive load management (auto-load shedding) and UTS (battery back-up) connection. See below for L5-30 hardware kit for hard-wiring and UTS back-up batteries.)				
⁽²⁾ This transfer switch DOES NOT include a load-side option. It must be hard-wired with an inlet box. See page 5-20 for L14-30 Power Inlet Box options.				
Hardware kit (30A) (for inlet box applications) (not shown)	3750	L5-30	32316-UTSHW*

Reliance Transfer Kits

30 Amp, 6-circuit, indoor w/25' cord and box	7500	L14-30	32316-31406CHK	
30 Amp, 10-circuit, indoor w/25' cord and box ⁽¹⁾	7500	L14-30	32313-Q310-CHK25*	

⁽¹⁾ These turn-key, load-side transfer switch kits offer hardwire/plug-in features, are totally pre-wired, and do not require additional feeder breakers. The 10-circuit transfer switch has interchangeable circuit breakers. Both kits permit relocating the flanged 30A inlet from the power inlet box to the transfer switch for direct cord-connection to the transfer switch.

TempLite®

TempLite is a surface-mount light fixture for installation into the L14-20 and L14-30 flanged inlet openings of most manual transfer switches when used with a power inlet box. The TempLite provides illumination to the face of the transfer switch while the generator is supplying power. By Reliance Controls.
